

Rohan Taori

<https://rohantaori.com/> | rtaori_at_stanford_dot_edu | San Francisco Bay Area

Education

Stanford University

Sep '20 - Present

Ph.D. Candidate in Computer Science

Studying the foundations of machine learning with an emphasis on the reliability of real-world systems.

University of California, Berkeley

Aug '16 - May '19

B.S. in Electrical Engineering and Computer Science

GPA: 3.98

Awards: Regents' & Chancellor's Scholar (top 2% of students), Highest Honors & Dean's List (top 3% of engineers)

Memberships: Eta Kappa Nu (HKN) honor society, 2019 Accel Scholar (program with VC firm Accel and Berkeley)

Research & Work

Berkeley AI Research – Undergraduate Researcher

Aug '16 - July '20

- Worked with Prof. Ben Recht on understanding robustness in real-world distribution shifts.
 - Study was the largest to date: compared ~200 models with 200+ ImageNet distribution shifts.
- Worked with Prof. Jitendra Malik on sample efficient deep RL using non-parametric value functions.
- Worked with Prof. Carlo Séquin on finding optimal solutions of irregular solids via gradient descent.

Uber ATG – AI Research Resident

Sep '19 - Mar '20

- Worked with Prof. Raquel Urtasun on large-scale traffic simulation for self-driving vehicles.

NVIDIA – Deep Learning Research Intern

May - Aug '19

- Worked with Dr. Bryan Catanzaro on new techniques for large-scale texture synthesis in near real-time.
 - Developed a new architecture which improves generalization to unseen test-time textures.

Facebook – Software Engineering Intern

May - Aug '18

- Built infrastructure to allow bots to send messages to hundreds of millions of users on the platform.

Salesforce – Software Engineering Intern

May - Aug '17

- Developed an API tool to allow external developers to integrate with the Salesforce database via REST calls.

Teaching

Machine Learning @ Berkeley – VP of Education

May '17 - Dec '18

- Led a 15-person team running two student classes, workshops, member bootcamps, and weekly reading groups.
- Created material for new deep learning class of 200 students; spearheaded creation of machine learning workshop series.
- Goal to bring ML education to students: content available for [[fall17](#) / [spring18](#) / [fall18](#) / [member class](#) / [workshops](#)]

Papers

Rohan Taori, Achal Dave, Vaishaal Shankar, Nicholas Carlini, Benjamin Recht, Ludwig Schmidt. *Measuring Robustness to Natural Distribution Shifts in Image Classification*. In submission to NeurIPS 2020. [[paper](#) / [website](#) / [code](#)]

Guilin Liu, **Rohan Taori**, Zhiding Yu, Ting-Chung Wang, Edward Liu, Karan Sapra, Fitsum Reda, Brandon Rowlett, Andrew Tao, Bryan Catanzaro. *Real-Time Universal Texture Synthesis using Feature Maps as Transpose Convolution Filters*. In submission to ACM Transactions on Graphics.

Rohan Taori, Amog Kamsetty, Brenton Chu, Nikita Vemuri. *Targeted Adversarial Examples for Black Box Audio Systems*. Published at the 2019 IEEE Security and Privacy Workshops. [[paper](#)]

Murtaza Dalal*, Alexander Li*, **Rohan Taori***. *Autoregressive Models: What Are They Good For?* Appeared in NeurIPS 2019 Information Theory and ML Workshop. [[paper](#)]

Projects

Programming Language Classification – ML@B partnership with GitHub

Aug - Dec '16

- Implemented 2-layer LSTM to classify programming languages, reducing error rate 40% compared to GitHub's baseline.

Take a Picasso – CalHacks 3.0 Project

Oct '16

- Robotic sketch artist; won Best Hardware Hack, Best 3D Printed Hack, and Peter Thiel's 1517 Fund grant. [[devpost](#)]
